Education

Masters, Computer science	Aug 2023 – May 2025
Texas A&M University-Corpus Christi	
Bachelor of Technology, Computer science	Aug 2018 – Jul 2022
Sphoorthy Engineering college, JNTUH	

Skills

Programming Languages: C, C++, Java, Python, GoLang.

Databases: SQL, MySQL, Oracle, Supabase.

Cloud Services: AWS, Google Cloud, Azure, Docker, Apache Kafka, RabbitMQ, Git, GitHub.

Web Development: HTML, CSS, Java Script, Node.js, Next.js, Express.js, Angular JS, React.js, PHP, JSON, jQuery, Spring Boot.

Core Competencies: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering, SDLC, Operating Systems, Distributed Systems, Parallel Systems, Computer Architecture, Networking, Agile Methodology, Scrum, Web Technologies, Data Modeling, Data Visualization, Artificial Intelligence (AI), Machine Learning (ML)

Tools: Visual Studio, GitHub, Anaconda, MS Office 365, Microsoft Excel, Google sheets.

Work Experience

Full Stack Developer - Tech Portal LLC, Remote	Oct 2025 – Present
- Developing and maintaining full-stack web application modules using React.js, Next.js, Node.js, and Supabase (PostgreSQL), implementing API integrations, server logic, database operations, and reusable UI components for a production SaaS environment. - Building secure, high-quality codebases with version control, documentation, and structured code reviews, improving system reliability while contributing to API development, database optimization, and feature deployment across distributed development pipelines. - Collaborating in an Agile, remote setup to deliver new features, improve UI/UX workflows, optimize application performance, and enhance platform scalability using modern JavaScript, Git, and cloud-based CI/CD tools.	
Full stack Developer – Verzeo, Hyderabad India	May 2021 – Jul 2022
- Spearheaded the coding and development of 10+ web portfolios, banking websites, and interactive online games such as <i>Connect 4</i> and <i>Piano Tiles</i> using a suite of technologies including HTML, CSS, JavaScript, Node.js, Angular JS, React.js, PHP, JSON, and jQuery. - Optimized front-end performance, improving user experience across platforms and reducing load time by 15% on average. - Collaborated with backend teams to ensure seamless integration and ongoing maintenance of deployed solutions.	
Frontend Developer – Skill Safari, Hyderabad India	Aug 2020 – Dec 2020
- Demonstrated Innovation in Developing and deployed 5+ fully responsive websites, while gaining proficiency in website replication for reference projects. - Gained expertise in handling sensitive user data through secure backend data management practices, ensuring 100% data integrity during web interactions. - Published multiple websites online, demonstrating practical knowledge in end-to-end website deployment processes.	

Academic Projects

Smart Hire Solutions (AI-Driven Job Matching Platform)

- Led a 10-member team to develop a scalable job-matching platform utilizing Node.js, Express.js, and MongoDB, effectively managing over 10,000 user profiles and resumes.
- Engineered RESTful APIs for user authentication, profile management, and resume parsing, enhancing system efficiency and reducing manual screening time by up to 60%.
- Integrated automated job scraping and real-time data ingestion, delivering personalized job recommendations and maintaining 91.9% system uptime.

Distributed Messaging System

- Engineered a **highly scalable, reliable, and fault-tolerant** messaging system capable of handling **millions of messages per day**, using technologies like Apache Kafka, RabbitMQ, and Apache Pulsar.
- Designed the system to efficiently distribute tasks across **multiple nodes**, improving system resiliency and uptime for real-world applications in **business messaging, real-time communication, and IoT platforms**.
- Optimized message processing speed, testing under heavy load conditions to reduce latency by **25%**.

Cross Entropy – Based English phrase Identification System

- Enhanced a machine learning model for part-of-speech tagging, achieving a **15% improvement** in accuracy for classifying English words by grammatical correctness.
- Revamped the model's detection capabilities by implementing advanced techniques such as maximum statistics and smoothing, which resulted in a **40% increase in accuracy** for identifying valid ('V') and non-detection ('N') phrases.
- Improved classification of unknown features by **20%** through innovative smoothing techniques, increasing the model's robustness on unseen datasets.

Certifications and Accomplishments

Google Data Analytics Professional Certificate (2025)

Microsoft Power BI Data Analyst Associate (2025)

AWS APAC - Solutions Architecture Job Simulation – Forage (Dec 2024)

Palo Alto Beacon Cybersecurity Training (Dec 2021)

Ethical Hacking & Cybersecurity Level 1 – Indian Servers (2019)

Core Java – Certificate of Training & Certificate of Excellence (Jun–Jul 2019, Score: 82%)

Certificate of Merit – J-HUB Hackathon (1st Place, 2019 & 2020)

- Mobile App for Health Care Facilities
- Detection of Malaria using Deep Learning
